Accelerator for Blue Growth

The Alliance: the accelerator of the SUBMARINER Network for Blue Growth EEIG.

Problem

To gather and combine the critical mass of actors, knowledge and infrastructure necessary to develop marine products and services in the Baltic Sea Region.

Solution

Transnational network of academic and commercial experts from a variety of sectors jointly offering mentoring, research & lab infrastructure, funding and organization of matchmaking events.

Market

The blue economy represents about 5.4 million jobs and generates a gross added value of almost 500 billion € p.a. in Europe. Blue Growth sectors within the Baltic Sea are new forms of aquaculture, marine biotechnology, ocean energy, monitoring technologies, clean shipping and coastal tourism.

Our Competitive Advantage

Proven track record. Product launch. Established active alliance of recruiters, investors (private venture capitalists & public funding programmes), new and alumni cases, supporting mentors, science & research infrastructure resources strong lobbying and marketing capabilities. Focus on the Baltic Sea Region.
